**BUSINESS SIGN-ON LETTER IN SUPPORT OF THE COMMON CORE STATE STANDARDS**

As companies and business organizations, we believe that it is imperative that ALL American students have access to an education that will prepare them for the opportunities and challenges they will face after high school. In a competitive world economy where education and/or training after high school is increasingly the norm for access to good jobs, to prepare students for anything less is, by definition, to deny opportunity.

Unfortunately, today, too few high school students graduate and, among those who do, too few graduate well-prepared for life after high school. In order to prepare today’s students for the challenging world they will encounter, it is critical that we set the right expectations. For this reason, we believe states need to have K-12 standards that will prepare all students by the end of high school for success in college and careers.

Currently, each state sets its own standards. This has led to a nation with 50 sets of inconsistent standards, even though the expectations of colleges and employers in math and English are nearly universal and are not bound by state lines.

We believe that the Common Core State Standards Initiative, led by the National Governors Association Center for Best Practices and Council of Chief State School Officers, has produced K-12 standards in the foundational subject s of math and English that meet the business community’s expectations: they are college- and career-ready, grounded in evidence and internationally-benchmarked. We, the undersigned companies and organizations, support the adoption of the Common Core State Standards by the states.

The Common Core State Standards are an important opportunity to set consistent, focused, rigorous expectations for all students; a necessary foundation for making the changes needed to improve student achievement and ensure the United States’ educational and economic preeminence.
